INTRODUCTION

TOP protocol, jointly built by New York Coinfund and Singapore Venture Capital Foundation. TOP protocol is developed to address pain points faced in industry and outfitted with resources that lead the sector.

The TOP protocol ushers in a new era of encrypted finance known as DEFI 4.0, setting a new benchmark for decentralized finance by placing a strong emphasis on transparency, trust and establishing meaningful partnerships. It's an era where innovation meets practicality. Our vision is clear, that's to create a financial ecosystem that is inclusive, secure, and sustainable.

DeFi platforms often rely on liquidity pools, and fluctuations in liquidity can impact the stability and functionality of the platform. Limited liquidity can lead to issues with trading slippage and price manipulation. With implementation of dual pool, other than LP pool for free trading, there is another floor floor protection.

TOP protocol safeguard holders' interests by preventing the price of tokens from dropping below a predetermined threshold. The innovation of the TOP protocol realizes DEFI's "boundless rise and bottomed fall", reducing investment risks by setting a minimum guaranteed price, while allowing TOP tokens to rise infinite while market conditions are good.

TOP PROTOCOL

VISION

In a world where technological innovation knows no bounds, TOP Protocol emerges as a beacon of possibility, pushing the boundaries of what a cryptocurrency can achieve. Our vision transcends the conventional, offering a glimpse into a future where boundaries are shattered, and opportunities abound. Our vision in TOP Protocol is to promote transparency, foster a vibrant community. TOP is about unity and make crypto fun!

TOP Protocol is not just about innovation—it's about community. We believe in the power of collaboration and inclusivity, forging partnerships and ecosystems that amplify our collective potential. Together, we build a vibrant, interconnected network where ideas flourish and dreams become reality.

VALUES

TRANSPARENCY

TOP PROTOCOL is supported by its community of enthusiasts. We encourage open communication and believe trust, transparency, and community are the 3 pillars to building longevity.

COMMUNITY

TOP PROTOCOL vision is to foster a vibrant community. TOP community believe that only together we are strong. Community is everything and TOP strives to include everyone from around the globe.

LONGEVITY

The community is fostering and adopting long term development of the ecosystem and foundation in efforts to drive real use cases. Unique mechanism of floor pool protection and multiple burning ensure project stability.

TRUST

In cryptocurrency market trust is paramount. That means full transparency not only in the community and development but also in security efforts. Floor pool authorities will be transferred to dead address.

TOP PROTOCOL DESIGN

TOP Protocol employs 3 simple function: Burn + LP rewards + Blackhole rewards

TOP token trading mechanism sets a fixed 2% transaction fee, 1% is return to floor pool, users can sell TOP token into floor pool whenever there is USDT using transfer function. Top token sold into floor pool will be burnt. This will help reduce the circulation of tokens and increase the value of tokens; the other 1% will be weighted Allocated to Liquidity Provider (LP) holders to reward them for their contributions in the liquidity pool. In addition, 5% of all trading profits will automatically returned to floor pool, ensure more volatility and potential inefficiencies in floor pool. To improve protocol security, floor pool permission authorities will be transferred to a dead address. Another 5% of trading profit will be rewarded for holders who burn their token into blackhole, which is determined by double of their investment value.

1%

Return into Floor Pool

1%

LP reward in USDT

TOP PROTOCOL

The TOP protocol's floor mechanism consists of two liquidity pools: one is a Pancakeswap liquidity provider pool for free trading and another is floor pool deployed in contract address.

You can sell \$TOP token into floor pool by transferring the token into floor pool contract address but cannot purchase, the tokens sold into floor pool will be burnt automatically!

FLOOR POOL CONTRACT ADDRESS: 0xe85562c6ff86a8ff0268222aff0205a26d37d68e

TOP protocol safeguard holders' interests by preventing the price of tokens from dropping below a predetermined threshold. The innovation of the TOP protocol realizes DEFI's "boundless rise and bottomed fall", reducing investment risks by setting a minimum guaranteed price, while allowing TOP tokens to rise infinitely while market conditions are good.

Floor pool price, executed by smart contract will change in accordance with Pancakeswap price.

When USDT is accumulated into floor pool from 5% profit tax, token holder will able to transfer TOP token and sell into floor pool, this will help to burn huge amount of token, token burning can create scarcity, which might lead to an increase in the value of the remaining tokens.

Token burns can be used as a mechanism to reward token holders. TOP protocol rewarded for holders who burn their token into blackhole, which is determined by double of their investment value.

Blackhole address to eligible for rewards:

0x000000000000000000000000000000000000dead

TOKENOMICS

**Token Symbol:
TOP**

**Initial Supply:
10 Million**

**BURNT
1.5 Million**

**LP POOL
8 Million**

**CEX listing
500,000**

ROADMAP

Phase 1

- Market research, initially put forward the idea of TOP Protocol
- Website and social media creation (TG and X 2000 members)
- Venture partnership and community building TOP token
- launch on BSC chain!

Phase 2

- Coinmarketcap, Coingecko listing, Dextools, AVE trending
- Token holders 15000
- CN token Moontok listing expanding Chinese community
- Contest and giveaways, AMA
- Article on Binance feed, influencers marketing push
- CERTIK Smart contract audit

Phase 3

- Token holders 30000
- AMA talkshow, global marketing
- Tier 1 Exchange listing such as Gate.io, Okex and Binance
- Integrate TOP token with fiat payment for mass adoption

Phase 4

- Release TOP swap, TOP stacking, collaborate with OKX/ Gate.io/ Binance
- WEB 3 wallet
- Tier 1 CEX listing
- Token holders 50000
